

AHEAD OF ITS TIME: The Rapid Post & Panel

The most innovative and efficient compression post system available in the industry today

The Rapid Post & Panel Temporary Edge Protection System has an unrivalled 9'-0" fixed center, which reduces manual handling, due to the decrease in the number of components needed to protect a leading edge. Installation time **IS TEN TIMES FASTER** than traditional drill and fix solutions, which in turn reduces exposure to the leading edges of the building. In addition, installation and dismantling the system does not require the use of any tools, and no drilling is needed, which reduces exposure to silica dust and HAVS (Hand Arm Vibration Syndrome).

10X FASTER than traditional drill and fix solutions

Rapid EPS is the world's leading Temporary Edge Protection System

- › Proven
- › Time-tested
- › Safer
- › Innovative
- › Highly efficient
- › Reduces manual handling
- › Fewer components
- › No tools required
- › Decreases leading-edge activity
- › No drilling needed
- › Does not contribute to HAVS
- › Eliminates exposure to silica dust

Do you know the HAZARDS of drilling concrete?

Over time, silica dust can build up in the lungs and breathing passages, which can make it difficult to breathe and could result in the disease known as silicosis! The innovative Rapid Post and Panel System does not require ANY drilling of the concrete slab. This removes any possible exposure to harmful silica dust that can be produced when the concrete slab is disturbed.

Edge Protection You Can Trust

Learn how Rapid-EPS can keep your worksite safe and secure.
